Power & Electrical Planning

Power and electrical can be specified on either wood or laminate Dylan Tables. One or two power modules may be used per table. **Each module consists of two power and two USB ports finished in a Silver Anodized Aluminum with a white trim.** Each module also includes a wire management system for a three-prong cord for 120 Volts at 120" long. Wire management is designed to neatly encase cords and is securely placed on the inside of one leg. For two power units, there will be two separate cords and encasings, each placed securely on the inside of each leg. The wire management is finished in Silver Anodized Aluminum.

There are two standard options for module placement. For one module, the module will be placed in the center of table top. For two modules, modules will be placed at both ends of the table top, equal distance from the edge of the table for a symmetrical effect. Please note, requests for alternate placement of modules will extend lead times and may not be honored due to design limitations. For all power and integration, please call for quote.
